Requirement Spec activity

What to explain today?

- Explain the points reviewed by the last IVI-EG and other members
  - The latest confluence page https://confluence.automotivelinux.org/display/IVIPR/4.+Power+state+management
  - Created change history page to describe what is the improvement
- Explain the requirement specification of System Anomaly Detection
  - This page is still under construction https://confluence.automotivelinux.org/display/IVIPR/5.+System+Anomaly+Detection
  - I'll prepare the page by May 28th.
    - Could you review it from May 31 to June 4?
- The request for reviewing other requirements for example (System launch / termination or logging support, etc)
  - I'll announce it in the mailing list each time so please check it.
