Technical Discussions Plan

■ Plan / History

#	date	Discussion Topics
1	Dec. 8, 2020	Kickoff, LifecycleManagement,
2	Jan. 7, 2021	LifecycleManagement, HelathMonitoring, + *"HAL", Yocto Recipe*
…	…	
8	May 27, 2021	Requirement Spec Review 2(Power State Management + α), ~~Flutter?, TBD~~
9	June 10, 2021	Requirement Spec Review 3(Service Launch/Termination, System Logging Support)
10	June 15, 2021 Virtual Workshop	Requirement Spec Review 4(Use cases for each function), …
11	June 24, 2021	Requirement Spec Review 5(Power State Management), ...
12	July 8, 2021	Requirement Spec Review 6(Service Launch / Termination, Service Failure Detection), ...
13	Aug 5, 2021	Requirement Spec Review 7(Service Launch / Termination, Service Failure Detection, System Logging Support, Backup Data Management, Vehicle Parameter Configuration),

Requirement Spec activity part1 (10min)

What to explain today…

- I explained the following requirements specification at the last meeting
    - Services Launch / Termination :
      https://confluence.automotivelinux.org/pages/viewpage.action?pageId=44826721
    - System Failure Detection and Procedure :
      https://confluence.automotivelinux.org/display/IVIPR/4.3+System+Failure+Detection+and+Procedure
    - I got a few additional points.
        - Services Launch / Termination
            - Service launch with power state transition / Service termination with power state transition
            - Static setting and Dynamic setting
        - System Failure Detection
            - Additional requirement：The frequency with which the Detector checks the service should be configurable.

Requirement Spec activity part2 (45min)

What to explain today…

- The additional requirements specification
    - System Logging Support :
      https://confluence.automotivelinux.org/display/IVIPR/4.4+System+Logging+Support
    - Backup Data Management :
      https://confluence.automotivelinux.org/display/IVIPR/4.5+Backup+data+management
    - Vehicle Parameter Configuration
      https://confluence.automotivelinux.org/display/IVIPR/4.6+Vehicle+Parameter+Configuration
    - The Message Notification function previously described is not an in-vehicle specific function, so we defined not to liste up as a required specification for product.
- For 3 requirements, If you have any additional points, please comment on the confluence page or contact me **by August 18(Wed)**. This slide is on the confluence page : https://confluence.automotivelinux.org/display/IVIPR/Minutes
