

# IVI-EG

14.Jan.2022

TOYOTA MOTOR CORPORATION  
Woven Alpha, Inc.

- Short term activity plans (~ March 2022)
  - Basesystem Update
  - Flutter Update
  - Policy Management
- Long term (~ 2024)
  - Internally under discussion
  - we want to discuss more on the next workshop

# Future Plan

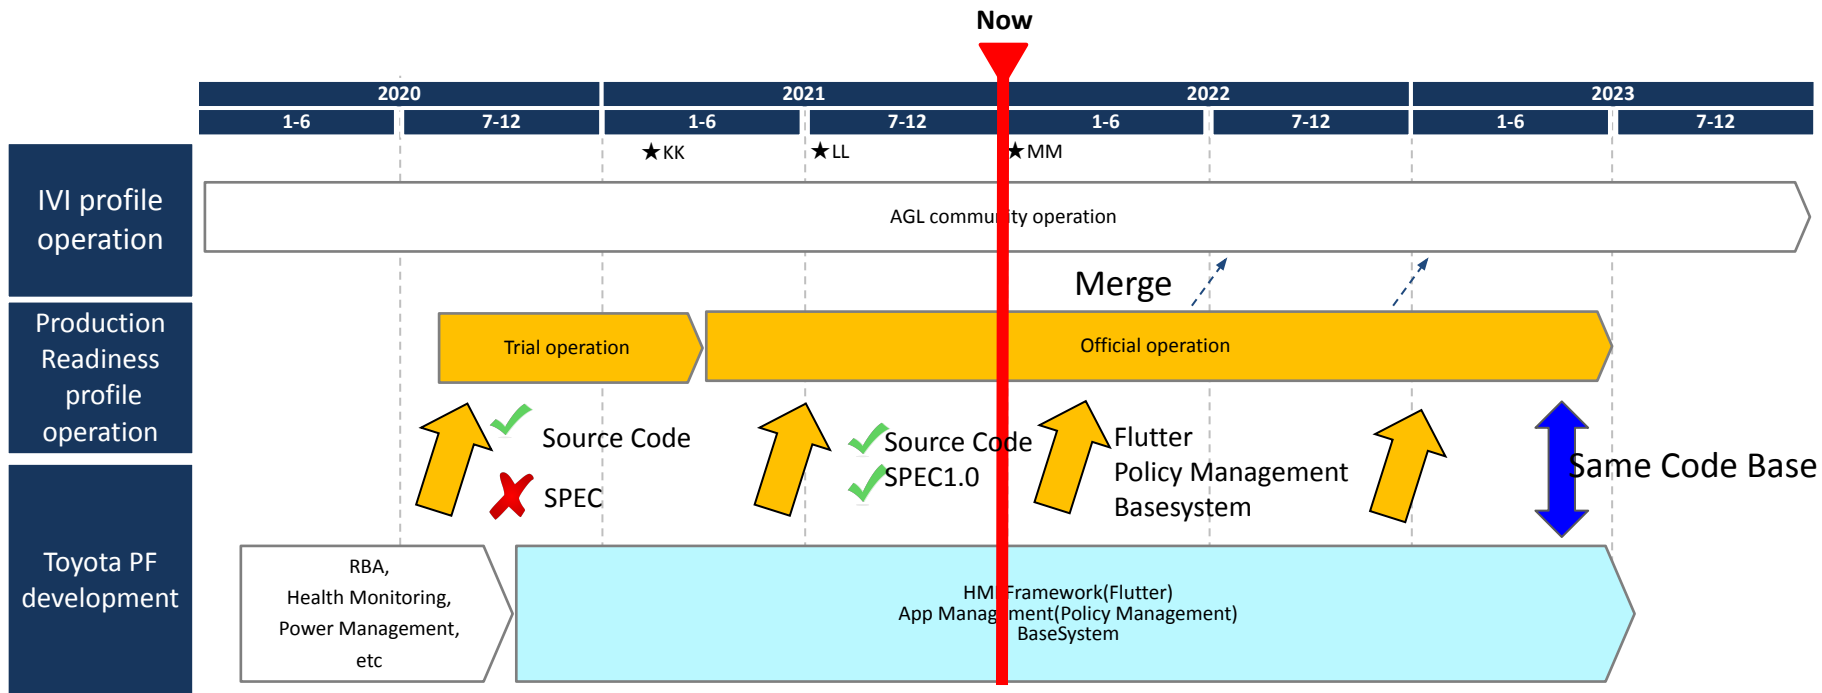

Fig.) Production Readiness future plan

Toyota continue to contribute new feature, update code and spec, to bring AGL's software closer to the product.

# Basesystem Update

---

- Update Plan (~3/E)
  - Refactoring
  - systemd based service launch / termination
  - dlt based log
  - etc.
  - Planning the 1st update around middle of February
    - mainly src code modification only, but might change yocto recipes
- Motivations
  - Enable to integrate with other parts
  - Make basesystem reviewable to other AGL community members
    - AGL systemd : already working on MM
      - Can TMC member join to AppFW EG to collaborate with collabora?
      - Will start doc review

# Flutter(ivi-homescreen) Update

---

- Update Plan
  - 3D rendering based on Google Filament
  - Plugin mechanism
  - (additional works based on requests from AGL community)
    - Igalia is more focusing on web apps
    - Bernard is trying to develop Flutter apps, but will discuss in SC
      - Multiple apps support is critical.
-

- The Detail is TBD
- What is “Policy Management”
  - Manage arbitration for audio and video with RBA
  - TMC in-house product
- Motivation
  - Intraoperative with basesystem (and Flutter App)
  - Make TMC product publicly available
    - To discuss with AGL community
- Request to Jan-simon
  - 4 repositories under staging/
    - Create JIRA to review
