

Vehicle to Cloud EG Home

Working Group areas

- Security: [Identity](#): support for provisioning, maintaining, and governing vehicle identity
- Data: [Messaging](#): support for messaging standards providing V2C outcomes
- Physical: [Vehicle Gateway](#): definitions for vehicle gateways acting in V2C capacities (TCU, domain gateways, etc).
- Reliability: Over-the-air system updates

Assumptions

The Vehicle to Cloud (V2C) working group assumes that a viable Vehicle to Network (V2N) connection has been established.

Vehicle to Cloud Reference Designs

- [Reference Design 1](#) - AWS
- [Reference Design 2](#) - Aicas
- [Reference Design 3](#) - SanCloud
